

## Case History

# Specialist Cleaning for large industrial unit

Following a change in ownership, a major industrial warehouse in Leamington Spa required a major clean up prior to the new owners moving in.

DD Porter Construction instructed Rainbow in Oxford to clean the 10,000m<sup>2</sup> warehouse from top to bottom, in the very tight timescale of just 10 days. This work included the need for high access machinery; scissor lifts, access towers and boom lifts to enable the technicians to access the top of the warehouse fixtures, as well as the ceiling of the warehouse.

Rainbow were able to complete this work within the required timescales, much to the delight of the customer. Due to Rainbow's large scale programme; no matter the size of the job, nor the environment of the job - the customer can always be assured it will be completed within the timescales required, and to the highest quality.
